Leading team to implement Oracle Logistics Cloud

We have wide cross-industry experience enabling high performance and change for the world's most complex supply chains. Working with Oracle and other strategic partners, our team of operational, technical and business change experts are proven to deliver best-in-class solutions to our clients.

OTM Cloud

OTM enables the management of global transport networks minimising freight costs, optimising on-time deliveries and driving sustainability initiatives.

WMS Cloud

The industry's leading Cloud-based WMS supports inventory management, inbound and outbound warehouse processes.

GTM Cloud

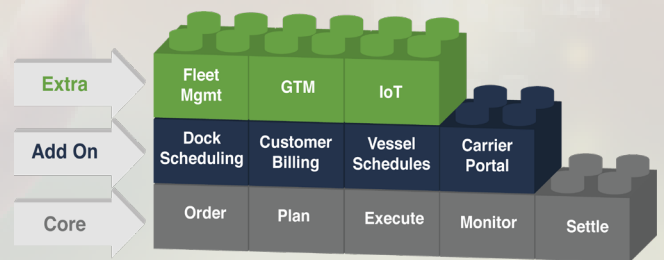

GTM supports all aspects of cross-border trade, import & export, including documentation and declarations, shipment screening and transaction data.

ORACLE

OTM First is our accelerated implementation approach. It combines our OTM solution template with a structured implementation track to deliver OTM in an agile and modular way, fast.

Why Flo?

We are dedicated to supply chain excellence. Our team is passionate about what they do and drive on-going value for our clients by solving business and technology challenges. Operating globally, we take a holistic approach to logistics incorporating people, processes, networks and technology.

Our solutions, based on industry-leading technology and best practice, are designed to help our clients realise top-line business benefits from their logistics initiatives as well as producing bottom-line savings and opportunities for continuous improvement. We support industry-leading logistics service providers and clients across sectors including manufacturing, retail, consumer products, defence and energy.
