Release Notes evolv DataLoader Version 23D

Headline Features & Improvements

- 🔹 **Single Sign-On** using Microsoft Azure is now supported to access the evolv Application Suite
- 🔹 Improvements to **Data Extract**
 - 🔹 Error Messages and Warning when Data Extract is empty
 - 🔹 Data Extracts can now be written to custom templates
 - 🔹 Data Extract parameters and track used to perform extract are shown in DataLoader Dashboard
- 🔹 **OTM Integration** – requirement for SR to Oracle to allow schema interrogation removed
- 🔹 Improved **Log Viewer** and **Web Log settings** can now be added to all services
- 🔹 DataLoader data transformation **improvements to evolv Syntax Language**:
 - 🔹 @w-list includes dlist variant
 - 🔹 @p-user_name will write the username of the person or machine account that is processing the template

Major resolved defects

With release 23D the following major defects have been resolved:

- 🍃 Download validation errors into custom template
- 🍃 Special character handling when sending data to OTM
- 🍃 Lookup Header Append Entry – Numeric Handling error

All Bug Fixes

- EVOLV-476: Assign File Import to the DEFAULT process group instead of DL_INTEGRATION_IN
- EVOLV-461: Config Manager does not load properly when you access evolv using SSO
- EVOLV-449: Adapter UI Issues
- EVOLV-446: Delete security object "Permission" failing
- EVOLV-442: Creating/Editing Web Log Setting causes error
- EVOLV-402: Validation Errors not showing in Custom Template
- EVOLV-384: Job Search Results should show label for Action Name and not value
- EVOLV-254: Config Manager - Special Instruction should show displayName rather than value
- EVOLV-255: Unable to delete Feature Item that has Repo File Var referenced in Baseline
- EVOLV-273: Filter predicate on Template Mapping Node not getting saved
- EVOLV-281: Join Column Name Field missing in Node Input Column of type "Join Table Column"
- EVOLV-278: Data Extract Parameter Issue with Fixed List
- EVOLV-303: Empty Parameters not being handled correctly in Data Extract
- EVOLV-300: Auto cache refresh in Template is causing Failure during Processing
- EVOLV-383: POST PROCESS ACTION appears twice in Process Excel File Job Parameters
- EVOLV-378: Prompt-title cannot be longer than 32 characters
- EVOLV-376: Handle null status code in DL Dashboard
- EVOLV-347: SV schema number fields are being created as number(22)
- EVOLV-385: Data Partition Blocking not working
