Elevate Your Logistics with
evolv Carrier Solution

evolv Carrier Solution

Take logistics management to a new level with evolv Carrier Solution. Securely exchange data with carriers, allowing seamless uploads of master data through our user-friendly portal. Ensure control before integrating with OTM and enhance transparency with detailed tracking.

**Experience the power of evolv Carrier Solution,
where efficiency meets excellence!**

Challenges managing your data from your carriers

How do you

manage the rates, invoices and disputes from your carriers?

minimize the manual effort of uploading data to your OTM environments?

keep an audit trail of the data exchanged with your carriers?

transfer your carrier data in a secure way?

standardize data inputs from carriers?

Business Benefits

Streamlined Operations

An extremely user-friendly interface ensures efficient and hassle-free operations. Your team experiences a seamless workflow, reducing the learning curve, minimizing manual effort and boosting productivity.

Accelerated Processes

Direct data transmission to OTM eliminates delays associated with traditional email methods and based on standard input templates. Experience a significant reduction in processing times, allowing for quicker decision-making and improved responsiveness.

Time Savings in Management

Drastically reduce the time spent on validating and uploading data such as managing rates, invoices, schedules and disputes. Allow your team to focus on strategic tasks, increasing overall operational efficiency.

Business Benefits

Enhanced Data Control and Quality

Maintain superior control over data quality, ensuring accuracy and consistency. Improve decision-making with reliable data leading to better outcomes and fewer errors.

Strengthened Auditing and Traceability

Reinforce auditing capabilities and enhance traceability of data exchanges. Achieve a robust system for data management providing transparency and accountability.

Secure Communication

Ensure secure and authorized data exchange protecting your information through a trusted environment for communication, which safeguards data maintaining confidentiality for all parties.

Key features

Carriers can upload data such as rates, events or invoices via the portal.

Ensure data quality with automated validation and, if necessary, review data objects with evolv Data Loader before uploading them to OTM .

Provide carriers with the latest upload templates to drive data consistency.

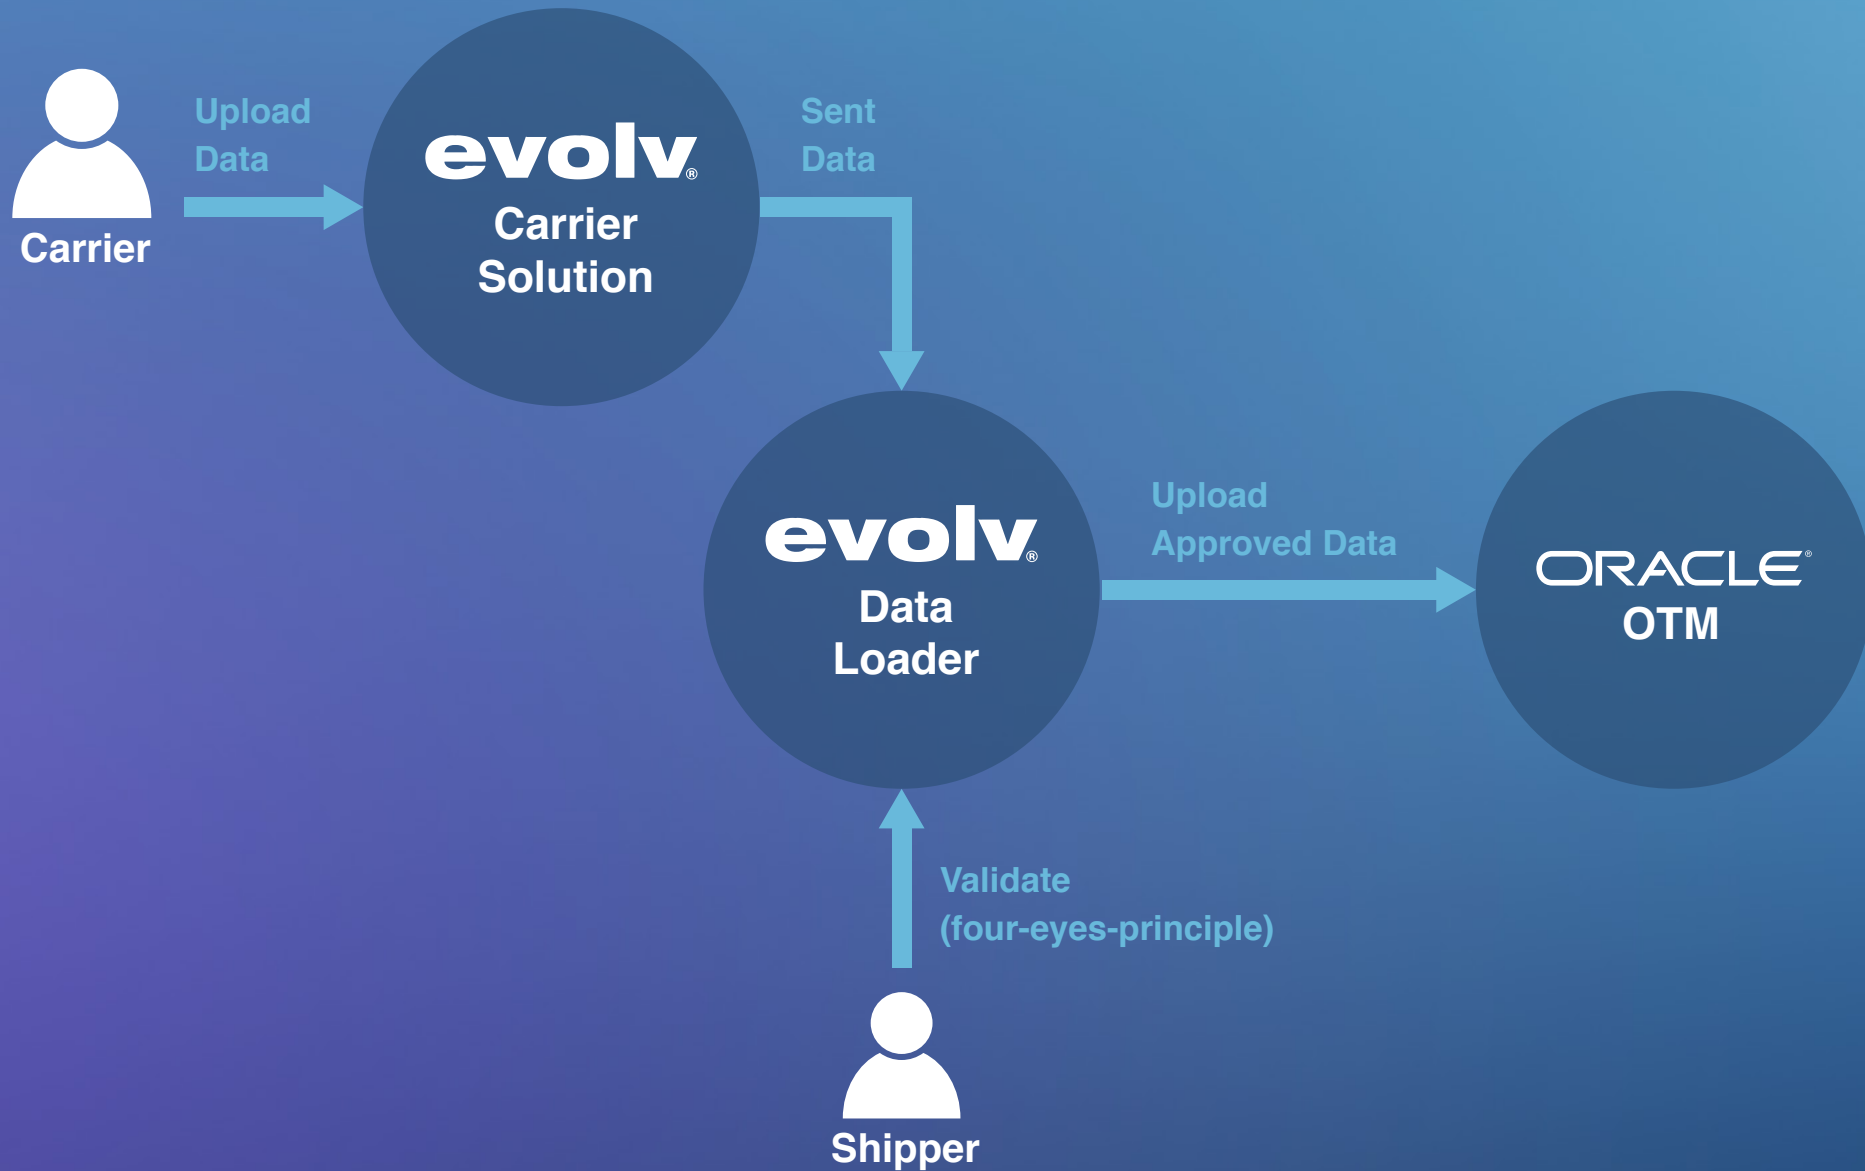

Secure and authorized data exchange with your carriers.

Track and trace data uploads by carriers.

Operation

User Interface

On the left hand side you see the list of usable templates for the user.

On the right hand side you see the area where you can drag and drop your filled file for uploading.

The screenshot displays the 'evolv' user interface. On the left, under the heading '1) Download Template', there is a search bar labeled 'Search by Template Name' and a table with the following content:

Template Name	Download
DEMO_LOCATION_CLOUD_CUSTOMER	

On the right, under the heading '2) Upload & Process', there is a large light blue box with the text 'Drag and drop or select file here'. Below this box, there is a link 'View full file list' and a checkbox labeled 'Next time, go directly to file list'.

Elevate Your Logistics

An unparalleled platform facilitating secure data exchanges with carriers.

Carriers can seamlessly upload data, e.g. rates, disputes, and invoices via our user-friendly portal, which is then validated in accordance with business rules.

Data can either be sent directly to OTM or subjected to a four-eyes principle before being sent by your user. Files that fail validation can be downloaded by the carrier and contain specific instructions on how to correct errant data.
